[welcome to mosaic college prep!](#) [1]

At Mosaic College Prep we help our clients present the best possible applications to college.

Unique to our process is our commitment to not only building strong applications, but also strong applicants. We emphasize a variety of soft skills rarely stressed in today's increasingly structured high school environment: leadership, personal relationships, critical thinking and creativity. Most importantly, we believe in taking the stress out of the college application process by building a positive work environment and deconstructing the shadowy world of college admissions.
